

Privacy Impact Assessment register

Under the Privacy (Australian Government Agencies – Governance) APP Code 2017 (Privacy Code), the RAAFVRT is required to maintain and publish a register of the Privacy Impact Assessments (PIA) it conducts for all high-risk privacy projects.

A project may be a high privacy risk project if RAAFVRT reasonably considers that the project involves any new or changed ways of handling personal information that are likely to have a significant impact on the privacy of individuals.

Since the Privacy Code came into effect on 1 July 2018, RAAFVRT has conducted no PIAs.

RAAFVRT will incorporate PIAs into the register as they are completed.

Year	PIA title	Project description	Date completed
2018/19			Nil
2019/20			Nil
2020/21			Nil
2021/22			Nil
2022/23			Nil

This register was last reviewed on 5 August 2022.
